About Infortrend

Founded in 1993, Infortrend Corporation (Public TPE:2495) is a leading provider of high performance networked storage solutions focusing on quality, reliability, choice, and value. Fueled by a depth of technological expertise and system level knowledge, Infortrend storage solutions have been widely deployed on a variety of demanding applications by multiple users across commercial and industrial markets. Our core brands include the ESVA®, EonStor DS and EonStor® product families.

on their investment and further maximize their application productivity when rebuilding or expanding their storage infrastructure.

Supporting storage protocols including Fibre Channel, iSCSI, SAS, SATA and SCSI, Infortrend products and solutions can be readily implemented in storage area networks (SAN) and direct attached storage (DAS) environments. Additionally, to meet top-tier application needs across business environments, the products and solutions are tested compatible with enterprise-level operating systems (OS) such as Windows® Server 2008, Solaris®, Linux®, IBM AIX®, HP-UX®, and server virtualization software such as VMware® and Microsoft Hyper-V, 2008 R2 and Oracle.

For detailed product information, please visit www.infortrend.com or contact Infortrend worldwide sales or channel partners.

Vision Statement - "Confidence through Excellence"

With a continuous investment in research and development, Infortrend has been dedicated to delivering upon its vision, "Confidence through Excellence". Infortrend provides its customers exceptionally high quality storage products and solutions to address their diverse requirements and protect their most valuable assets - applications and data. Infortrend's commitment to ensuring customer satisfaction, security and loyalty through product excellence is shared by Infortrend's global network of suppliers, distributors and storage integrators.

Award-Winning Products and Solutions

Infortrend offers a wide range of storage products and solutions which incorporate leading technologies to achieve high performance, reliability and ease of use. The proprietary ASIC design delivers advanced processing capability, the award-winning hardware ensures high availability, and the user-friendly management tools simplify administration.

With the ESVA Series, users are also able to take advantage of two-dimensional scaling, thin provisioning and distributed load balancing to achieve optimal return

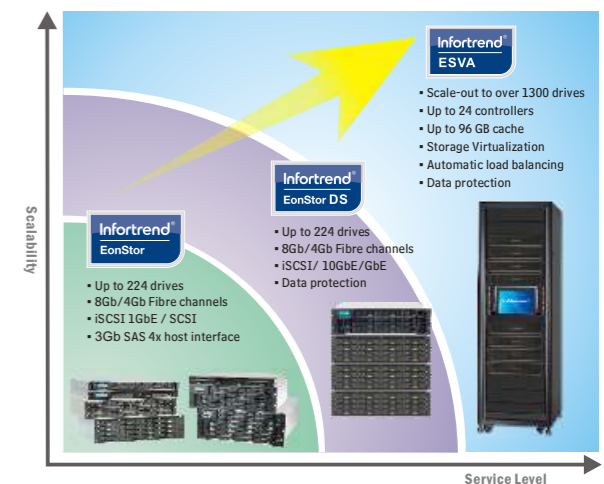

Key Milestones, Awards and Achievements

- > 2010
 - Infortrend introduces the EonNAS family, the advanced unified storage solution
 - Infortrend introduces the EonStor Data Service (EonStor DS) product line

- 2009
 - Infortrend introduces the ESVA (Enterprise Scalable Virtualized Architecture), a revolutionary SAN storage architecture
 - ESVA wins "Best Choice" award during Computex Taipei
- 2008
 - B12F Series wins "Best Choice" award during Computex Taipei
 - Ranked #7 in Worldwide External Disk Storage System Shipments by IDC
- 2007
 - Infortrend introduces SANWatch® storage management software
- 2003
 - Infortrend announces EonStor product line, the first Infortrend branded products

Infortrend introduced the world's FIRST ...

- > 2.5" HDD RAID array in 2007
- > SAS RAID array in 2005
- > SATA RAID array in 2003

Worldwide Service and Support

Headquartered in Taipei, Taiwan, Infortrend operates businesses through a global presence with joint forces of direct branch offices and channel partners. Our corporate offices located in the United States, the United Kingdom, Germany, China and Japan work with headquarters to penetrate American, European and Asia Pacific storage markets. With the help of an extensive global network of channel partners, our dedicated and competent sales and technical support teams deliver timely and efficient services, 24/7 worldwide.

EonStor family -
Infortrend's First Full-Featured Branded Product

Introduced in 2003, EonStor established Infortrend as a leading provider of brand-name storage products. The entry-level storage systems come fully equipped with proprietary ASIC, high-speed CPU and SANWatch®, the storage management suite exclusively developed by Infortrend. Via the intuitive GUI of SANWatch, users can easily access all functions necessary to discover, configure, administer, and monitor EonStor systems. Affordable for restrictive SMB budgets, the EonStor family of products is designed to enable cost-effective storage consolidation while delivering high data throughput, high reliability and flexible scalability.

EonStor DS family -
Affordable High Availability Storage Solution

Based on the robust EonStor hardware platform, Infortrend developed EonStor DS storage solutions to support business-critical applications. At an affordable price point for SMBs, EonStor DS provides a comprehensive suite of data protection features to ensure the highest data availability. Coupled with advanced hardware design, modular architecture, easy and intuitive management, and exceptional price-performance, EonStor DS brings price-conscious companies a decisive competitive edge by making IT efficiency keep up with growing storage needs.

ESVA family -
Enterprise Scalable Virtualized Architecture

The ESVA Series is a leading-edge storage solution for mid-range enterprise Fibre Channel or iSCSI SAN applications. ESVA delivers outstanding performance and reliability, allowing seamless integration within the existing IT infrastructure. Equipped with a complete portfolio of data services and advanced hardware design, the ESVA Series is ideal for mission-critical environments where scalability, performance and availability are paramount.
